# School Superintendent's Report

---

To the School Board and Citizens of Dummer:

I herewith present for your consideration my second annual report as superintendent of your schools, together with a table of school statistics for the last complete school year ending July 1, 1922.

During this last year the Superintendent has made a total of 111 visits to the five schools of the town, an average of 22 visits per school for the year of 36 weeks, which was maintained in all schools as required by law.

At the beginning of the year the work for the various grades was outlined and the pupils were classified in these grades as far as possible. With a few exceptions the pupils are now well classified by grades in all the schools. These exceptions occur in schools where the work has been in the past somewhat confused, neither teacher nor pupil knowing exactly how much work was expected.

It has been the aim of the superintendent to make the requirements fairly definite and when a pupil is advanced from one grade to another to know that such a pupil has accomplished a definite amount of work in the various school subjects.

At the various visits of your Superintendent classes have been examined and the work in different subjects inspected in order to definitely determine that a proper amount of ground was being well and thoroughly covered.

Three schools were continued for the year with no change of teachers—a circumstance of some value in itself. In the other two schools owing to resignations one change each was made. I am of the opinion that your teachers for the most part have been faithful, efficient and willing to give their best for the welfare of the school as a whole. Of the seven different teachers employed during the year three had had previous experience, all were possessed of some high school education, and three had taken work beyond the high school grade.

I would suggest that all parents visit the schools at least once or twice during the year and in that way become acquainted

at first hand with the teacher and the work in the school and not be obliged to depend upon hearsay evidence, which, to say the least, is at times unreliable. Some of the parents have shown such interest in the school work.

The school buildings are not in all ways up to standard as regards heating, lighting, ventilation and sanitary requirements. These conditions could be improved without heavy outlay.

There has recently come to my attention a statement from the State Board of Education relative to the expenditure of the school money of the State as a whole. It would seem that this statement might be of interest to citizens generally, and I accordingly append it to this report. Out of every dollar spent for education in New Hampshire teachers' salaries require 53.3 cents. The remainder of the dollar is expended as follows:

Equipment .....	8.3 cents
Books, supplies and tuitions.....	6.7 cents
Debt, interest and insurance.....	5.9 cents
Fuel and janitors' supplies.....	5.5 cents
Transportation .....	5.3 cents
Janitors' salaries .....	4.4 cents
Superintendents' salaries .....	4 cents
Teachers' training .....	2 cents
Mothers' aid, medical inspection.....	1.9 cents
Local administration .....	1.8 cents
State administration .....	.9 cent

Respectfully submitted,

W. S. Adams.
